

# Decoding the Production Date in ABSEL Battery Markings

THE PRODUCTION DATE OF ABSEL BATTERIES  
IS ENCODED IN THE FIRST FOUR CHARACTERS  
OF THE MARKING.

## Decoding principle (example code: 5D06):

Position in Code	Meaning	Example (5D06)	Interpretation
1st character	Last digit of the production year	5	Year 2025
2nd character	Production month (letter code)	D	April
3rd and 4th characters	Day of the month	06	6th day

### Alphabetical month coding:

January — A	February — B	March — C	April — D	May — E	June — F
July — G	August — H	September — I	October — J	November — K	December — L

### Final interpretation for the example code:

The marking 5D06 corresponds to the production date April 6, 2025.
